“Quote

— JULIE NEWMAN

Dear Premier,

Please keep the state ban on gene manipulated (GM) canola for five more years. Herbicide tolerant canola means more toxic sprays, gene contamination and health risks.

My family and I want only GM-free crops on farms and in our food. We are angry that most foods made using GM are unlabelled. Our choice of what to eat has been taken away.

We strongly urge you to:

- extend the GM crop ban until 2013 at least;
- label all foods made using GM — from animals, crops and microbes;
- stay GM-free until all states and their citizens agree to change.

We eat, we vote and we want GM-free!

Yours sincerely,

SIGNED
